SUMMARY

Analytics engineer and data analyst with 4+ years turning raw operational data into trusted models, KPIs and self-service dashboards. Built Power BI reporting for a Mercedes-Benz plant on a centralized Databricks lakehouse and modeled warehouse data marts on AWS. Advanced SQL, dbt, Python, Power BI (DAX), statistics and A/B testing, plus AI assistants that answer data questions in plain English.

SKILLS

BI & Analytics: Power BI, DAX, Power Query, KPI design, Excel, **Tableau**

Languages: SQL, Python, PySpark, Bash

Data Engineering: dbt, Data modeling, Databricks, Delta Lake, Data quality, ETL/ELT, Airflow, Spark

Databases & Warehouses: Snowflake, Amazon Redshift, PostgreSQL, SQL Server, MySQL

Machine Learning: Statistics & A/B testing, pandas, Time-series forecasting, Anomaly detection, scikit-learn, NumPy, XGBoost, LightGBM

Cloud: AWS (S3, Glue, Lambda, Redshift, Athena), Azure (Databricks, Data Factory, ADLS)

EXPERIENCE

Data Analyst | Mercedes-Benz

Vance, AL • 11/2025 – Present

- Delivered phase-1 Power BI dashboards on curated lakehouse tables, giving **150+** plant users near-real-time visibility into throughput, first-pass yield and downtime, and eliminating **12 hrs/week** of manual reporting.
- Modeled curated lakehouse tables in Azure Databricks with SQL and PySpark, unifying **10+** plant data sources (MES, SAP, quality, line sensors) into one governed source of truth for reporting.
- Implemented automated data-quality checks, lineage and role-based access on the lakehouse, reducing KPI discrepancies escalated by plant leadership by **60%**.
- Partnered with production, quality, maintenance and IT stakeholders to prioritize use cases, define KPIs and run phased rollouts in Agile sprints, with user training that drove adoption across **5** shops.
- Built LLM agents that answer plain-English data questions by generating SQL and refreshing dashboard views, with alerts and maintenance tickets triggered only after human approval.

Data Scientist, Co-op | Veeco Instruments

San Jose, CA • 07/2024 – 12/2024

- Built Power BI tool-health dashboards and presented model findings to process-engineering and service leadership, informing maintenance planning for **3** product lines.
- Built anomaly-detection models on high-frequency tool sensor time series (temperature, pressure, flow) using Isolation Forest and autoencoders, flagging process drift **6 hours** earlier on average than static alarms.

Member Technical Staff | HCL Technologies

Bengaluru, India • 02/2021 – 06/2023

- Modeled star-schema data marts in Redshift and Snowflake used by BI and data-science teams, and built SQL views powering Power BI reports.
- Built batch and streaming ETL/ELT pipelines on AWS (S3, Glue, Lambda, Kinesis, Redshift) with PySpark, processing **2 TB+** of data daily for a **Fortune 500** client.
- Tuned Spark jobs and Redshift queries (partitioning, file compaction, sort and distribution keys), cutting runtimes **45%** and monthly compute costs **30%**.

Trainee Software Engineer | Quest Global

Bengaluru, India • 11/2019 – 10/2020

- Developed Python and SQL automation tools for engineering-services clients (data validation, report generation), reducing manual effort by **30%**.

EDUCATION

M.S., Data Analytics | Northeastern University

Boston, MA • 08/2025

B.E., Mechanical Engineering | Siddaganga Institute of Technology

India • 01/2019

CERTIFICATIONS

AWS Certified Data Engineer Associate (DEA-C01) | Amazon Web Services

2025

Machine Learning: Supervised Machine Learning: Regression and Classification; Advanced Learning Algorithms | DeepLearning.AI

2026

IBM Data Science Professional Certificate | IBM

2023
